[Technology Project and Industry Cooperation](#)

In cooperation with the not-for-profit club Akaflieg Freiburg, I write and maintain **Enroute Flight Navigation**, an open source flight navigation app aimed at general aviation pilots. The program is available for Android devices, iOS devices and Linux desktop computers. At the time of writing, the app is in daily flight service, with over 23,000 active installations worldwide.

- In October 2023, the German Niethammer Foundation has honored Enroute Flight Navigation with its “Innovation Award”.
- In summer 2021, the German aviation magazine Aerokurier has honored Enroute Flight Navigation with its “Innovation Award”, as one of the three most important innovations of the year in the category “Avionics”.

I cooperate in the development and operation of the software with AIR Avionics, a medium-sized company based in Baden-Württemberg, Germany. The main focus of the company's activities is aviation communication, air traffic control, traffic avoidance, and navigation.
